\$200 Million Lawsuit Springs from Lead Exposure in Drinking Water

Is there elevated lead contamination in the Washington, DC water supply which impacts children's health? The following Internet link discusses the proposed class action suit and agency probes:

[Link to The Washington Post Feb 18, 2008 Article](#)

A Rimkus **Certified Industrial Hygienist** recently conducted a water quality survey of a Houston nursing home where there were concerns about the safety of the water supply. Not only does lead contamination impact children, but also senior citizens and those with weak immune systems.

Will this contamination issue flood to other areas of the United States as did lead paint exposure?
